* Arguments: ✓ default parameters
* parameters: ✓ Rest parameters

* Default parameters:

b = 6 ⇒ default parameter

```
function add(a, b=6) {
    console.log(a+b)
}
add(7); // a=7, b=6 ⇒ 13
add(5, 7); // a=5, b=6 ✗ = 7 = 12
```

default parameter

* Rest parameters:

↳ related to function, parameter. as like default parameters.

(...)

Result

eg

```
function add(...number) {
    // Rest parameters (store all argument in Array) = number
}
add(1,2,3,4,5,6);
```

Let numbers = [1,2,3,4,5,6]

it can be anything

Variable Name

Actual value → Arguments

* function declaration
* parameters / arguments
* default parameters
* Rest parameters

* Function Expression

2. * Function expressions: [Let, Var, Const] To create variables

fe
